Scope of the conference

A special attention of the CETeG & ČTS 2021 meeting will be devoted to the geodynamic evolution of the Alpine–Carpathian–Dinaridic and Paleozoic orogenic belts of Europe, theoretical aspects of structural geology, petrology and geochronology, as well as neotectonics and sedimentary basin evolution. Several invited speakers provide hints to the main topics of the meeting, but any other contributions related to the common CETeG & ČTS topics are welcome.

Keynote lectures:

- **Shah Wali Faryad:** Spatial and temporal relations of high-pressure metamorphic events in geodynamics of the Western Carpathians
- **Milan Kohút, Igor Broska, Igor Petřík and Pavel Uher:** Variscan granitoid magmatism of the Western Carpathians
- **Jarosław Majka and Marian Janák:** Subduction-collision and exhumation processes in the Arctic Caledonides – petrological proxies from HP rock complexes
- **Ivica Pavičić, Rastislav Vojtko, Ida Pavlin, Peter Žitňan, Jaroslav Lexa, Ján Prcúch and Peter Koděra:** Structural control and three-dimensional geological modelling of the epithermal Au-Ag deposit of Banská Hodruša (Štiavnica Stratovolcano, Slovakia)
