

Instructions for authors of abstracts of the CETeG meeting 2012 for publishing in the journal Mineralia Slovaca:

Editor **MS Word** / Font **Times New Roman 12 b.** / Page format **A4** / Line spacing **2**. Total number of lines per abstract is maximum **55 including the abstract title, addresses, acknowledgement and references**. Shorter abstracts will be accepted, too.

Above the limit of 55 lines each abstract **can include one figure or table**, increasing its informative value. The maximum width of the figure or table after DTP processing will correspond with the width of one column in the journal Mineralia Slovaca, i.e. **8.2 cm**, and maximum acceptable height is **8 cm**. When drawing such a figure, or table, an increased attention must be paid on its readability due to its small dimensions. The picture must be submitted in the high resolution jpg format, eventually in formats cdr or xls. In the text at least one reference must relate to the embedded figure or table. With the figure or table, also short describing text must be submitted, in the printed version being placed beneath the figure.

The Conference Organizers bear responsibility for the scientific value of abstracts. These by this way belong to the category of reviewed abstracts.

If any uncertainty, please, contact Zoltán Németh - Mineralia Slovaca (zoltan.nemeth@geology.sk).
